

# Season Opens Next Thursday for Black Breasted and Golden Plover and Greater and Lesser Yellowlegs

## SHORE BIRD TIME OPENS THURSDAY

Species Include Black Breasted and Golden Plover and Yellowlegs.

### FEDERAL OPENING DATES

The season for migratory shore birds, which includes the black breasted and golden plover and lesser yellowlegs, opens according to Federal regulations, next Thursday in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware and Virginia. The season closes on November 30.

September 1 is the opening day for Vermont, Pennsylvania, Ohio, West Virginia, Kentucky, Indiana, Michigan, Illinois, Iowa, Missouri, Kansas, Nebraska, Colorado and Nevada. December 1 is the last day for shooting in Wisconsin, Minnesota, North Dakota, South Dakota, Montana, Idaho and Wyoming. The open season is from September 7 to December 30.

The open dates in Oregon and Washington are between October 1 and December 15 inclusive. In Utah the season is closed until September 1, 1918.

The jackknives or Wilson snipe season, according to the Federal regulations, opens in Maine, New Hampshire, Vermont, Massachusetts, New York (except Long Island), Ohio, West Virginia, Kentucky, Indiana, Michigan, Illinois, Iowa, Missouri, Kansas and Nebraska on September 15 and closes on December 1.

In Rhode Island, Connecticut, Long Island, New Jersey, Pennsylvania, Washington, Oregon, Nevada and Utah the season begins on October 1 and closes on January 15.

In Wisconsin, Minnesota, North Dakota, South Dakota, Montana, Idaho, Colorado and Nevada September 7 is the opening day and December 30 the closing.

The woodcock season opens on October 1 and closes November 30 in the following States: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Michigan, Illinois, Iowa, Missouri, Kansas, Nebraska, North Dakota, South Dakota, Nebraska, Kansas, Colorado, Wyoming, Montana, Idaho, Utah, Nevada, Oregon and Washington.

There will be no open season this year for woodcock in Illinois, Kentucky and Missouri.

The present regulations of the biological survey prescribe a daily closed season from sunset to sunrise. A proposed amendment is to open the shooting hours on these birds and other migratory species one-half hour before sunrise during the open seasons. It is not likely, however, even if the amendment is agreed to, that it will go into effect before the season opens.

Under the Federal migratory bird regulations there is no open season at present for the shore birds in the United States. The shore birds are protected by the Federal Government and are not to be shot.

In New York State the shore bird limit is fifteen in the aggregate of all birds in one day and not more than twenty-five in the aggregate of all birds in one season.

The New Jersey limit is fifteen birds a day.

## 'LOCOED' RIVER DAZES FISH AND WILDFOWL

Following Humboldt, Forget Direction and Are Victims.

South America's "River of Doubt" has a rival in the Humboldt River in Nevada, which comes forward with an entirely new claim to distinction, according to Fred A. Harker, valuation engineer of the Southern Pacific.

He claims the river flows southwestward through the central portion of Nevada near the line of the railroad. This river is believed to be in point of size and length the greatest in the United States. It is so named because of the strange tales of fish and game that have been told in the past.

At one place adjacent to the railroad, between two points two and a half miles apart, the river's length is eight miles by the shortest route. It is believed to be the longest river in the world.

## "Submarine" That Lurked Off the New Jersey Coast.

Ocean snailfish weighing 183 pounds caught by David I. McMeekin of Brooklyn and Messrs. Long and Cheney of Philadelphia.

## CROAKERS BITING AT SANDY HOOK

Erratic Fish Taken in the Horseshoe; Party of Four Catches 250.

SANDY HOOK, N. J., Aug. 11.—Croakers are biting in the Horseshoe, and a number of boats from Princeton Bay and the New Jersey shore are finding excellent sport with this sportsman's favorite.

Four men the other day took in the Horseshoe a catch of 250 fish. It has not been reported before that croakers in these waters cannot be taken at any time of the tide.

The croaker is the best fish to lure these days, but at times the ready blither of the croaker, black mullet, clam, and, of course, the increasing extensive shrimp, which may also lure the fish.

The fish in these waters weigh from three-quarters to two and one-half pounds and grows to a length of eight or ten inches. The croaker is a particularly fine fish, which has been taken in these waters for many years.

The croaker is a particularly fine fish, which has been taken in these waters for many years. It is a very common fish in the Horseshoe and is taken in large numbers.

## CLOSED GAME SEASON NOT ALWAYS A HELP

Beneficial Only When Not Made Attractive to Vermin.

Are closed seasons for a term of years of benefit to game? A. G. MacVicar, who has made a study of game conditions, discussing the subject with a Star reporter yesterday said:

"It is sometimes claimed that a closed season for a term of years would be a great benefit to game. That has been tried by several States for varying lengths of time, but has never to my knowledge brought the hoped-for results. Neither is it reasonable to expect good results from keeping sportsmen from the woods. On the other hand, comparatively small closed areas may be beneficial, provided that in making them attractive to birds they are not made correspondingly attractive to vermin."

In Scotland some years ago, when grouse driving was started, the latter bags caused a good deal of mischief among both sportsmen and gamekeepers. The grouse, however, soon dispelled this pessimism. It was found that the birds increased in spite of the greater number killed. In many cases they more than made up for the loss.

There were two reasons for this increase. First, in driving the grouse were broken up, mixed and scattered. This did away largely with inbreeding and led to a more vigorous stock. The second reason was that the birds were driven to the open, where they were more exposed to the attacks of vermin.

When a cover is driven over the guns the old pair almost invariably lead, and are therefore almost always killed. It is a fact well known to gamekeepers that all gamekeepers have been known to kill a pair of birds, and that the area claimed and occupied by one old pair would hold three or four pairs of the more numerous birds.

The foregoing facts should be borne in mind when considering the advisability of stopping all shooting for a long period.

## ASBURY PARK F. C. WINS. Ellingshausen of Midland Beach F. C. Makes Casting Record.

ASBURY PARK, N. J., Aug. 11.—The Asbury Park team won the Ocean City and Asbury Park fishing tournament, the auspices of the National Association of Surf Angling Clubs. The conditions were five casts, open field, four game fish, and one half hour.

Weather conditions were favorable for good work. The consistent casting of Asbury Park team landed their first fish by a close margin. The score was: Asbury Park Fishing Club, 7,495 feet 4 inches; average per man, 300 feet. Ocean City Fishing Club, 7,285 feet 7 inches; average per man, 291 feet 3 inches. Midland Beach Fishing Club, 7,055 feet 2 inches; average per man, 282 feet 2 inches.

Asbury Park and Ocean City made perfect scores, while Midland Beach lost one lead cast and one cast on a foul. In the morning's open field event Asbury Park team cast first and won by a margin of 100 feet. Ocean City team had been the ambition of surf casters for the past two years. Asbury Park team had been the ambition of surf casters for the past two years.

## CASTING AID TO FISH CONSERVATION

Makes Man Master in Fair Fight and Adds Pleasure to Angling.

CHICAGO, Aug. 11.—Dr. H. J. Muller, president of the National Amateur Casting Association, is making the conservation of all anglers and lovers of the sport to the most important of conservation work of the fishing industry.

In discussing the subject with a Star reporter yesterday Dr. Muller said: "The conservation of the fish is the most important of conservation work of the fishing industry. It does not preclude the use of the fish, but it does preclude the use of the fish in a way that would destroy the fish."

Conservation of the fish is the most important of conservation work of the fishing industry. It does not preclude the use of the fish, but it does preclude the use of the fish in a way that would destroy the fish.

## TROUT INCREASE; PICKEREL DECREASE

Anglers Delighted With Present Conditions in the Adirondacks.

### 20 POUND SALMON TAKEN

By KENNETH W. GOLDTHWAITE.

SARANAC LAKE, N. Y., Aug. 11.—The gradual disappearance of pickerel in many bodies of water in the Adirondacks has led to an increase in the number of whitefish and trout in these waters. Anglers are greatly impressed with the increase in the number of whitefish and trout in these waters.

Discussion of fish and fishing is occasioned by less on account of food supply than in the past. Among the suggestions for the improvement of the food supply is one that involves the selling of inland lakes and streams for food fish during the period of the war. The plan is to be permitted only after the breeding season is over, and then to be done by State officials.

Advocate of the proposition to net fish has made one statement which does not find indorsement by anglers in this district. He charges that the regulation of the sale of fish in the Adirondacks has been wasteful and that inferior results have been obtained.

Many inquiries have been made of anglers and guides concerning fishing conditions, and the effect of the Adirondack water with trout and other fish. Perhaps one of the most interesting reports is that made by William Williams, a guide at the Adirondack Park, who has been fishing in the Adirondacks for many years.

Williams has been fishing in the Adirondacks for many years. He has been fishing in the Adirondacks for many years. He has been fishing in the Adirondacks for many years.

## Many Good Lightweights Covet Leonard's Crown

Welling, Cline, Callahan and Johnson Have Best Chance—Caddock Surprised by Being Exempted for Physical Disability—Other Gossip.

### BY CROSS COUNTER.

During the hot weather last in boxing enthusiasts have been themselves arranging for a tournament of lightweights, the winner to meet Leonard for the title. In a majority of these lightweights, Charles White, Ever Hammer and Willie Jackson are in prominent positions. Joe Welling, Pete Hartley and Leo Johnson are also mentioned. Johnny Dundee is assigned to the honor position in the list, although it is by no means certain he will give Leonard as hard an argument as he has in the past.

I will venture to submit my opinion as to the order in which the contenders should be placed. First, Joe Welling, second, Pete Hartley, third, Charles White, fourth, Pete Hartley, fifth, Charles Callahan, sixth, Charles White, seventh, Leo Johnson, eighth, Willie Jackson.

I have placed Welling first on the list because in his last bout with Dundee he won handily and because when in good condition he has the heaviest punch of any lightweights. He is a powerful fighter and is a heavy ringer. If any one has a chance to win the title it is Welling.

Cline Elzibitz. Irish Pete Cline has made such a remarkable record in boxing and has been so successful in the past that he is the favorite of the crowd. He is a powerful fighter and is a heavy ringer. If any one has a chance to win the title it is Cline.

From Pulpit to Brakes. Formerly a prizefighter, then a minister of the Gospel and now a railroad brakeman is the record of the Rev. Fred Wedge of Chicago. While a minister he conducted boxing matches in his parish under the rules of the State Boxing Commission and taught his Sunday school boys the rules of the fistio pastime.

Mr. Wedge now finds that with the H. C. of L. and debts to pay it is necessary to undertake a more lucrative profession. He has been a brakeman on the railroad, which is more than he ever got as a minister. He has been a brakeman on the railroad, which is more than he ever got as a minister.

Frankie Callahan is a good all round boxer, with vitality, speed and hitting in the head. He is a powerful fighter and is a heavy ringer. If any one has a chance to win the title it is Callahan.

Leo Johnson has a bit more of a reputation than he would be one of the most dangerous men in the class. He is a powerful fighter and is a heavy ringer. If any one has a chance to win the title it is Johnson.

Welling, Cline, Callahan and Johnson have the best chance of winning the title. Caddock is surprised by being exempted for physical disability. Other gossip.

## FLY FISHING IN MOONLIGHT FUN

Another Fortnight of Real Fishing Weather Promised in Adirondacks.

### BATTLE OF WITS VS. FINS

Old Forge, Aug. 4.—Fishermen about the lower Adirondacks are about to give the last call for the fishing season, for after the waning of the present full moon and what promises to be a hot month the trout and bass will be more plentiful. A student of fly fishing in the Adirondacks, however, another fortnight of real fishing weather.

The fishing season, as all other seasons, has been tardy this year. In June, when the best angling period began, in April it terminated. This year the ice had no more than melted in May, and a unusually early spring has kept the fish from running into the lakes. However, a cool June has satisfied the fish in their shallow haunts.

A kind of fishing that is called "fly fishing" is the most popular of the fishing season. It is a sport that is called "fly fishing" and is the most popular of the fishing season.

A kind of fishing that is called "fly fishing" is the most popular of the fishing season. It is a sport that is called "fly fishing" and is the most popular of the fishing season.
